

Benjami Bono

Switzerland · [Portfolio](#) · Benjami Bono

Web developer with 3+ years creating solutions. Self-taught professional specializing in modern frontend technologies to help businesses build dynamic web applications. My background transitioned from business director to developer, giving me unique insight into client needs and business optimization. I craft clean, efficient code and user-focused interfaces while continuously expanding my backend skills toward becoming a full-stack developer.

Strong communication abilities complement my technical expertise in solving complex challenges. Multilingual professional available immediately for on-site opportunities in Switzerland. Eager to contribute and take on new challenges.

Proven track record delivering responsive React based applications that enhance user experience and drive business results.

For more info in my background, links and projects visit my [portfolio](#).
